

# Point of Sale V10

## Features and Benefits

“Helps you boost the bottom line at your store.”

### The New Point of Sale Lineup!

Point of Sale Free – The simplest way to ring sales and take payments

Point of Sale Basic – Basic sales and inventory tools that make it easy to stay on top of your business

Point of Sale Pro – Complete inventory, sales and customer tools to help you boost your bottom line

### Reasons to Believe

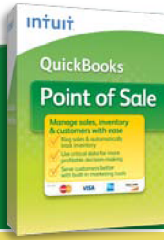

- Know exactly where you are making money and where you are not with sales, inventory and customer data at your fingertips.
- Save time on everyday tasks. Managing inventory, updating prices, setting discounts, transferring data to QuickBooks Accounting software and other time consuming tasks just take a few clicks instead of hours of work.
- Keep your customers happy with personalized service, emails and newsletters, and loyalty programs.
- Get up and running in no time. Simple setup instructions make it easy for you or employees to start ringing sales in no time.
- Get a complete retail solution to help you boost your bottom line even more. QuickBooks Point of Sale is available with essential retail hardware and integrated credit card processing so you can help save time and and money taking payments.

### New Features & Benefits!

- New simpler, easy to use and train interfaces for key tasks: ring up sales, items, customers, home page and setup
- New User interface works great with touch screen monitors.
- Messages feature: easily create notes throughout Point of Sale, the notes will be stored in a central place making it easy to follow up.
- Quick Pick Item Selection: from the receipt screen you can quickly select from groups of items, such as items that you are not able to tag with a barcode, or services that you offer. You'll be more organized.

### Additional Important Facts

- More than half of current QuickBooks POS users don't use multiple lanes. With version 10, users can switch between single and multi user modes for database set up. This will reduce start up errors.
- QuickBooks POS v10 has switched to an embedded EFT server. This will result in reduced authorization issues.
